Your Comments:

The restoration of the proposed area is vital to the health of the waterway and the shores along that waterway. I believe the proposed plan looks good however my concerns are that all of the affected areas will not be completely safe from contaminants when the project is complete due to the partial removal of contaminants. The areas that are contaminated should be safe for animals and humans to visit and water should be safe to be in. Will this be the case with the proposed plan?

Thank you for your time.
